

## **ELECTRICITY**

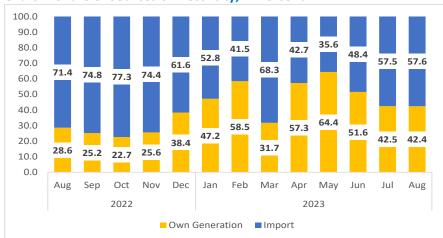

August 2023

**Chart 1: Electricity Sources Composite Index, Percentage Change** 

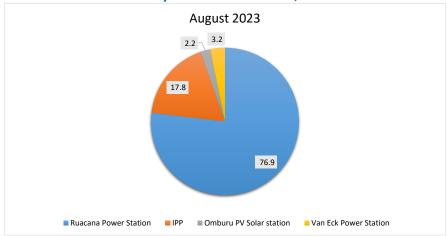

The Electricity Sources Composite Index, comprising of own generation (local production) and imported electricity decreased by 5.6 percent in August 2023, in contrast to the 1.3 percent growth registered in the preceding month. Conversely, the index recorded a marginal increase of 0.3 percent on a yearly basis (Chart 1).

**Chart 2: Share of Sources of Electricity, in Percent** 

In August 2023, the aggregate demand for electricity declined to 355 541 MWh, down from 376 572 MWh recorded in the previous month, and up from 354 308 MWh noted in the corresponding month of 2022. Own generation accounted for 42.4 percent (150 729 MWh), while imports constituted 57.6 percent (204 813 MWh) of total demand during the month of August 2023.

**Chart 3: Share of Electricity for Own Generation, in Percent** 

 In August 2023, local electricity amounted 150 729 MWh. Ruacana power station contributed the majority with 76.9 percent (115 870 MWh), while Independent Power Producers (IPP) collectively generated 17.8 percent (26 772 MWh) of local production (Chart 3).

**Chart 4: Electricity Import Index, Percentage Change** 

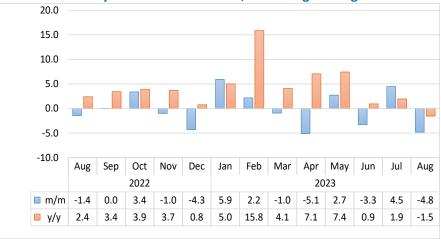

- The Electricity Import Index recorded a decline of 5.4 percent in August 2023 compared to a growth of 20.3 percent that was registered in July 2023. Additionally, the index witnessed a 19.0 percent annual decline (Chart 4).
- In August 2023, 204 813 MWh of electricity was imported, with the majority sourced from Zesco Zambia (54.0%), followed by South Africa (22.3%), and Zimbabwe (18.5%) in second and third place, respectively.

**Chart 5: Electricity Sales Composite Index, Percentage Change** 

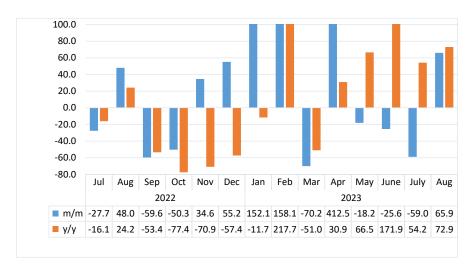

- The **Electricity Sales Composite Index** for August 2023 recorded a 2.3 percent monthly decline, compared to a 1.0 percent reduction registered in July 2023. However, on annual basis, the index displayed a 1.1 percent increase (Chart 5).
- Total electricity sales during the month of August 2023 amounted to 317 762 MWh, a decrease from 325 112 MWh noted in the previous month, and an increase from 314 255 MWh that was registered during the corresponding month of 2022.

**Chart 6: Electricity Domestic Sales Index, Percentage Change** 

- The Electricity Domestic Sales Index declined monthly by 4.8 percent in August 2023 compared to an increase of 4.5 percent registered during the preceding month. Additionally, the index registered a decline of 1.5 percent year-on-year (Chart 6). Electricity was mainly sold to Redistributors LPU (69.6%) and Mines (22.1%).
- The total electricity sold locally decreased to 298 484 MWh during the month under review, from 313 495 MWh recorded in July 2023, and 303 106 MWh of electricity recorded in the corresponding month of 2022.

- The **Electricity Export Sales Index** recorded a monthly growth of 65.9 percent in August 2023, compared to a decline of 59.0 percent registered in the preceding month. However, the index registered an increase 72.9 percent year-on-year (Chart 7).
- During the period under review, Namibia exported 19 279 MWh of electricity, of which 89.0 percent was supplied to STEM Sales-SAPP, followed by Botswana (5.8%) while 2.8 percent and 2.4 percent was destined to South Africa and Angola, respectively.

<sup>&</sup>lt;sup>1</sup> This chart is limited to 100 percent for better presentation.

**Methodology**: Graphical and tabular analysis

**Data Sources**: The data source for the volume of electricity is sourced from Nam-power. These are data on domestic and export sale, Own

Generation and import sources. The Production is in kilowatts per hour (kWh) for all the variables.

**Index calculation:** The index of sales and sources weighted uses the volume data of 2015.

**Conversion**: 1 basis point = 0.01 percent
