

ELECTRICITY OCTOBER 2023

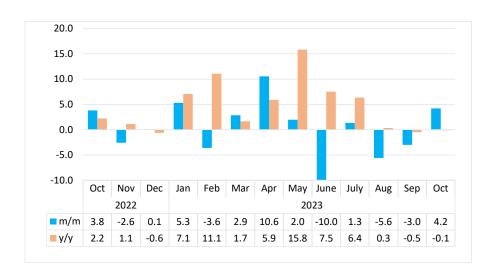

Chart 1: Electricity Sources Composite Index, Percentage Change

• The Electricity Sources Composite Index, comprising of own generation (local production) and imported electricity increased by 4.2 percent in October 2023, in contrast to a decline of 3.0 percent registered in the preceding month. Conversely, the index recorded a marginal decrease of 0.1 percent on a yearly basis (Chart 1).

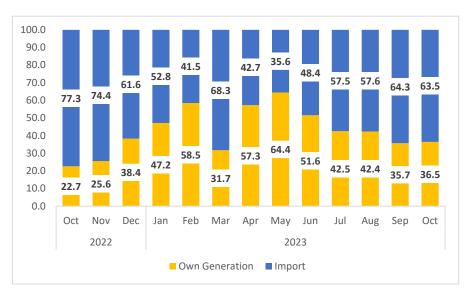

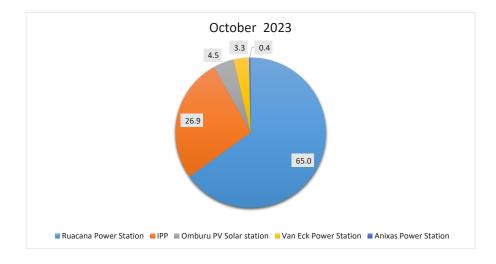

Chart 2: Share of Sources of Electricity, in Percent

 In October 2023, the aggregate demand for electricity increased to 359 358 MWh, up from 344 853 MWh recorded in the preceding month, while 359 803 MWh were recorded in the corresponding month of 2022. Own generation accounted for 36.5 percent (131 052 MWh), while imports constituted of 63.5 percent (228 332 MWh) of total demand during the month of October 2023.

Chart 3: Share of Electricity for Own Generation, in Percent

 In October 2023, local electricity that was generated amounted to 131 052 MWh. Whereby, Ruacana power station contributed the majority with 65.0 percent (85 248 MWh), while Independent Power Producers (IPP) collectively generated 26.9 percent (35 195 MWh) of local production (Chart 3).

- The **Electricity Import Index** slowed down recording an increase of 2.9 percent in October 2023 compared to a growth of 8.3 percent that was posted in September 2023. On the other hand, the index witnessed a decline of 17.9 percent over the year (Chart 4).
- During October 2023, a total of 228 332 MWh of electricity was imported, with the majority sourced from Zambia (48.5%), followed by South Africa (23.9%) and Zimbabwe (17.0%).

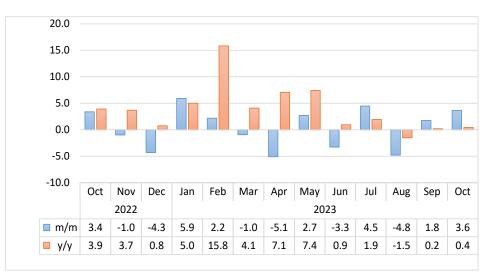

Chart 4: Electricity Import Index, Percentage Change

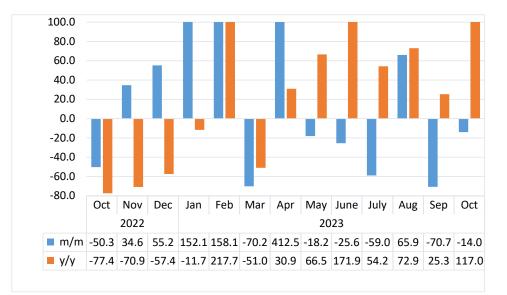

- The **Electricity Sales Composite Index** for October 2023 rebounded on monthly basis recording an increase of 3.3 percent, as opposed to a decline of 2.6 percent registered in September 2023. Additionally, the index registered an increase of 1.3 percent on annual basis (Chart 5).
- Total electricity sales during the month of October 2023 amounted to 319 668 MWh, an increase from 309 372 MWh noted in the previous month, while 315 646 MWh were registered during the corresponding month of 2022.

- The Electricity Domestic Sales Index for October 2023 grew by 3.6 percent compared to an increase of 1.8 percent registered during the previous month. Additionally, the index registered a marginal increase of 0.4 percent year-on-year (Chart 6).
- The total electricity sold locally increased to 314 812 MWh during the month under review, from 303 727 MWh recorded in September 2023, and 313 408 MWh of electricity recorded in the corresponding month of 2022. Electricity was mainly sold to Redistributors - LPU (67.1%) and Mines (24.7%).

Chart 7: Electricity Export Index, Percentage Change¹

- The **Electricity Export Sales Index** recorded a monthly decrease of 14.0 percent in October 2023, compared to a decline of 70.7 percent registered in the preceding month. On the other hand, the index expanded by 117.0 percent year-on-year (Chart 7).
- During the period under review, Namibia exported 4 856 MWh of electricity, of which 53.0 percent was supplied to STEM Sales-SAPP, followed by Botswana (24.6%) while 12.1 percent and 10.3 percent was exported to South Africa and Angola, respectively.

Methodology : Graphical and tabular analysis

Data Sources : The data source for the volume of electricity is sourced from Nam-power. These are data on domestic and export sale, Own Generation and import sources. The Production is in kilowatts per hour (kWh) for all the variables.

Index calculation: The index of sales and sources weighted uses the volume data of 2015.

Conversion : 1 basis point = 0.01 percent
