

# ELECTRICITY

SECTORAL REPORT - JULY 2022

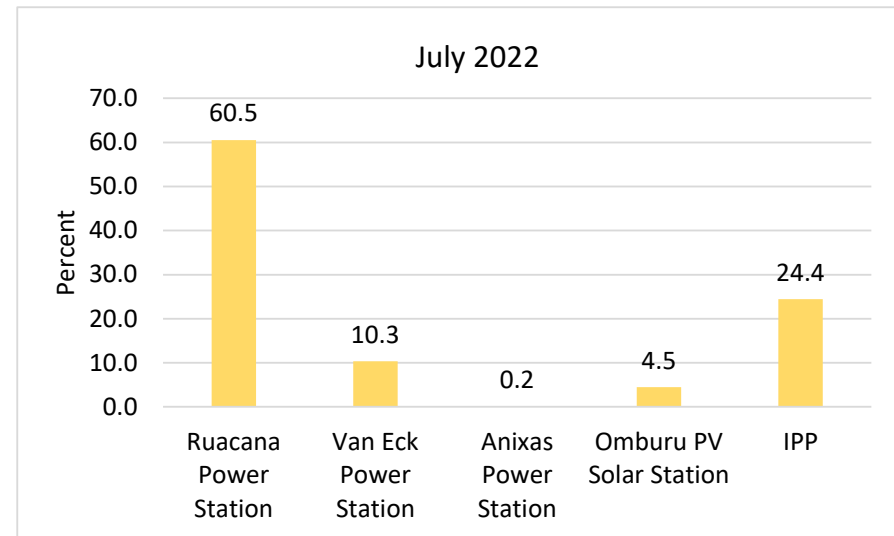

**Chart 1: Electricity Sources Composite Index, Percent**

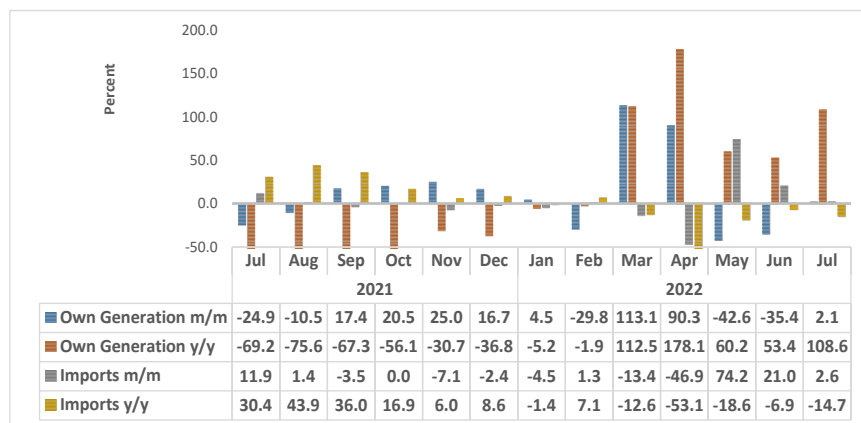

- The **Electricity Sources Composite Index**, which is composed of own generation (production) and imported electricity for the month of July 2022, posted an increase of 2.5 percent compared to a reduction of 3.1 percent recorded during the preceding month. While, on yearly basis, the index recorded a similar increase of 2.5 percent.
- The index for import on the other hand recorded a slowed growth during the month under review.
- During the month of July 2022 the Own Generation index recorded a growth of 91.0 percent month on month due to the escalation of electricity generation from the Ruacana Power Station.

**Chart 2: Contribution of sources to own generation, Percent**

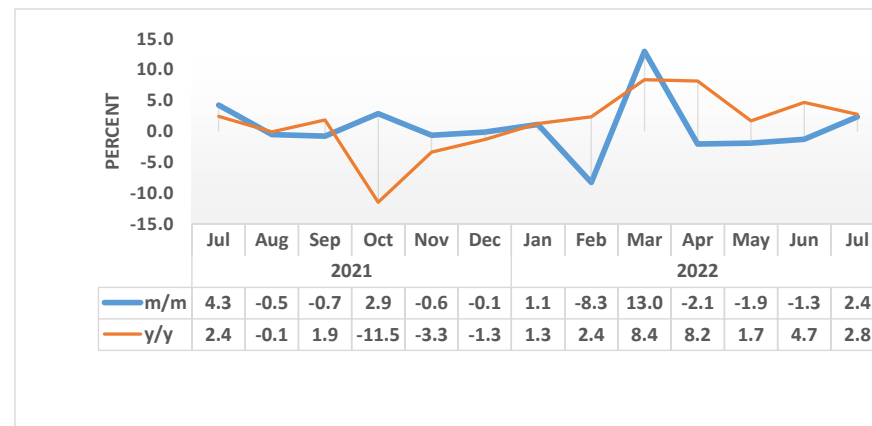

- The local production of electricity for July 2022 stood at 100 515 MWh compared to 98 405 MWh produced in June 2022. Ruacana power station contributed 60.5 percent to own generation. The Independent Power Producer's (IPP) collectively contributed 24.4 percent.

**Chart 3: Electricity Source Index, Percent**

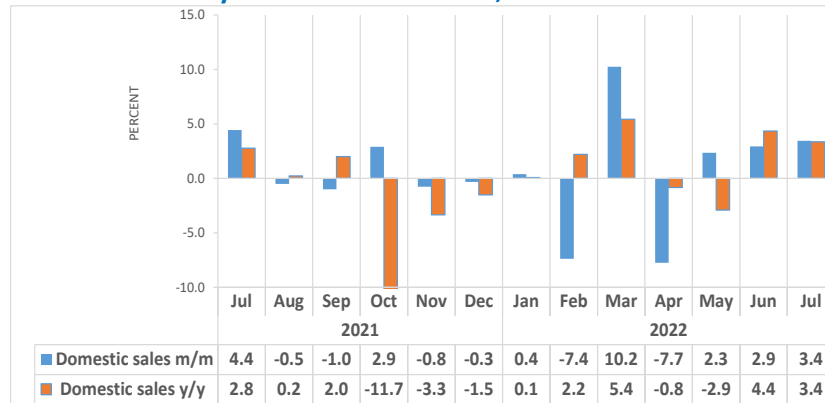

- The **Import Index** slowed down, recording a monthly increase of 2.6 percent in July 2022, compared to an increase of 21.0 percent that was registered in June 2022. However, the index declined further by 14.7 percent year on year.
- A total of 253 554 MWh of electricity was imported into the country in July 2022. The electricity was mainly sourced from Zesco in Zambia (52.6%), followed by Eskom Aggeneis in South Africa (18.8%), ZPC in Zimbabwe (13.9%) and Day Ahead Market-SAPP (10.2%) in the third and fourth place, respectively.

**Chart 4: Electricity Sales Composite Index, Percent**

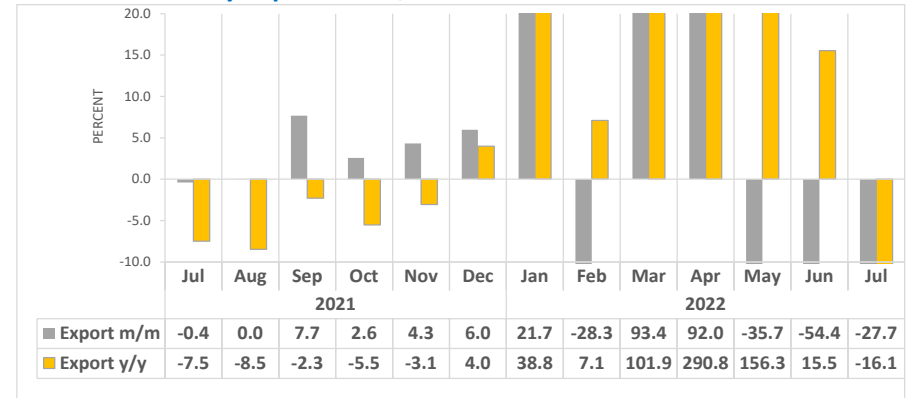

- The **Electricity Sales Composite Index** for July 2022 posted a monthly increase of 2.4 percent, in contrast to a reduction of 1.3 percent recorded in June 2022. The index recorded an increase of 2.8 percent year on year.
- The monthly decline in the index was mainly due to the reduction in export of electricity that recorded a notable decline of 27.7 percent (Chart 6).

**Chart 5: Electricity Domestic Sales Index, Percent**

- The **Domestic Sales Index** recorded an increase of 3.4 percent month on month in July 2022 from a growth of 2.9 percent posted a month earlier. Similarly, the index registered an increase of 3.4 percent on an annual basis.
- Electricity was mainly sold to Redistributors - LPU (67.2%) and Mining (25.5%) on the domestic market, while Eskom Orange River scooped a share of 3.7 percent.
- The total amount of electricity sold locally increased from 297 285 MWh recorded during June 2022 to 307 537 MWh registered during the period under review. Whereas 297 535 MWh of electricity was sold in the corresponding period of 2021.

**Chart 6: Electricity Export Index, Percent**

- The **Export Sales Index** declined by 27.7 percent in July 2022, from a decline of 54.4 percent registered a month earlier. The decline in exports was mainly reflected in exports of electricity sales to South Africa. On an annual basis, the index declined by 16.1 percent when compared to a reduction of 7.5 percent posted in the corresponding year of 2021.
- In the month of July 2022, Namibia exported a total of 7 535 MWh of electricity of which 47.7 percent of electricity went to Botswana, followed by STEM Sales-SAPP (30.4%) while Angola received a share of 14.5 percent.

**Methodology** : Graphical and tabular analysis

**Data Sources** : The data source for the volume of electricity is sourced from Nam-power. These are data on domestic and export sale, Own Generation and import sources. The Production is in kilowatts per hour (kWh) for all the variables.

**Index calculation:** The index of sales and sources weighted uses the volume data of 2015.

**Conversion** : 1 basis point = 0.01 percent
