MINING

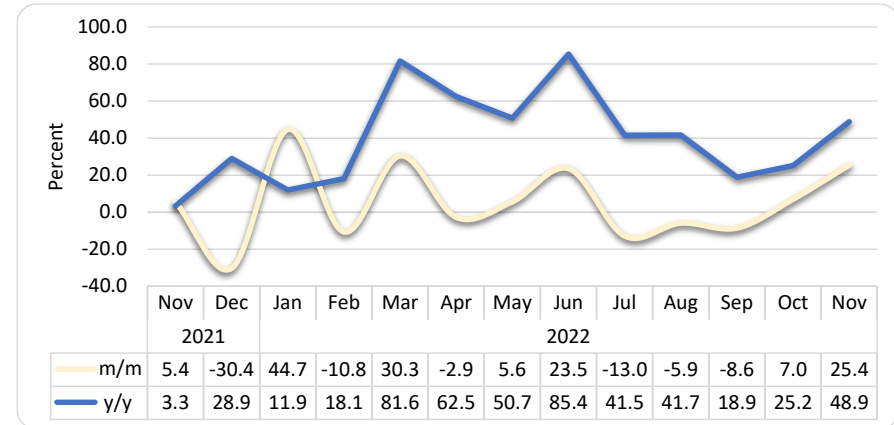

SECTORAL REPORT - NOVEMBER 2022

Chart 1: Mining Composite Production Index, Percentage Change

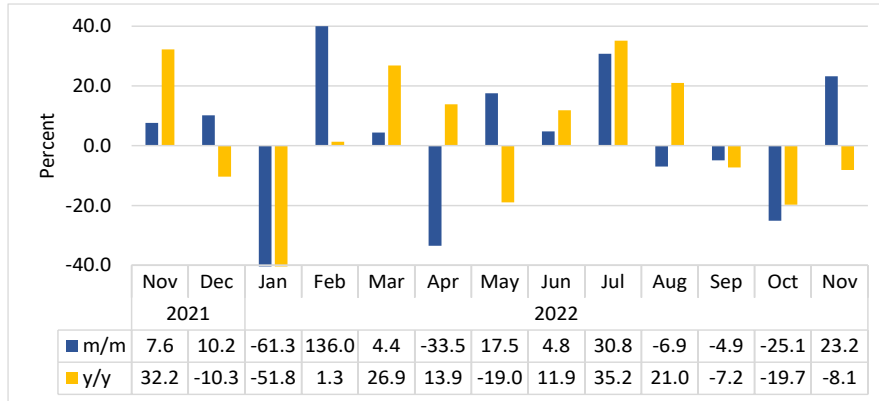

- The **Composite Mining Production Index** (Chart 1) consists of Diamonds, Gold Bullion, Uranium and ‘Zinc concentrate and contained’ recorded an increase of 19.0 percent in November 2022, compared to a growth of 1.8 percent that was registered in October 2022. Moreover, the index recorded a growth of 20.8 percent year on year.
- The improvement registered on a monthly basis is attributed to an increase Diamonds and Uranium. ‘Zinc concentrate & Contained’ recorded a monthly reduction, whereas Gold bullion index slowed.

Chart 2: Diamond Production Index, Percentage Change

- The **Diamond Production Index** (Chart 2) increased by 25.4 percent on monthly basis in November 2022, compared to a growth of 7.0 percent recorded a month earlier. Moreover, the index increased year on year, registering a growth of 48.9 percent.
- The growth registered on monthly basis is due to increased carats mined mainly at the land based mine as the Debmarine Namibia's new mining vessel has continued with its production since the second quarter of 2022.
- For the month of November 2022, the volume of diamonds produced amounted to 220 633 carats, compared to 175 969 carats and 148 165 carats recorded during the preceding month and November 2021, respectively.

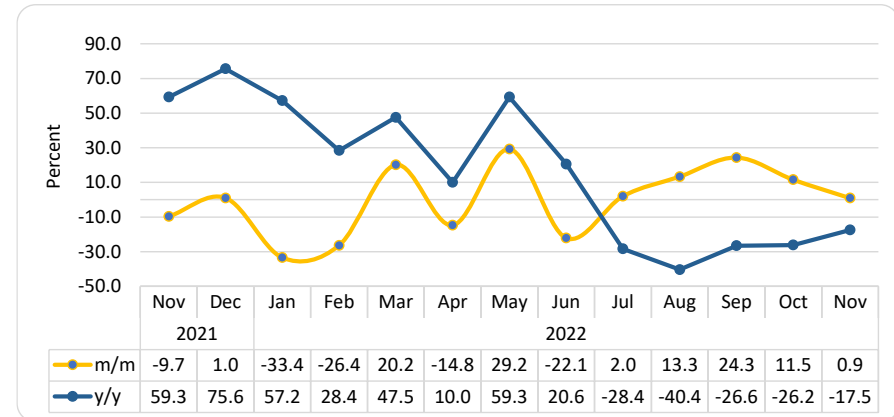

Chart 3: Uranium Production Index, Percentage Change¹

- The **Uranium Production Index** (Chart 3) rebounded monthly by recording an increase of 23.2 percent in November 2022, in contrast to a deterioration of 25.1 percent recorded in the preceding month. However, on an annual basis, the index declined by 8.1 percent.
- The increase registered monthly in the production of uranium was attributed to the high-grade of ore mined. Moreover, the availability of sufficient water supply required to mine and process uranium minerals efficiently also contributed to the increased production during the period under review.
- For the period under review, 572 tonnes of uranium were produced, compared to 464 tonnes and 622 tonnes produced in October 2022 and the corresponding month of 2021, respectively.

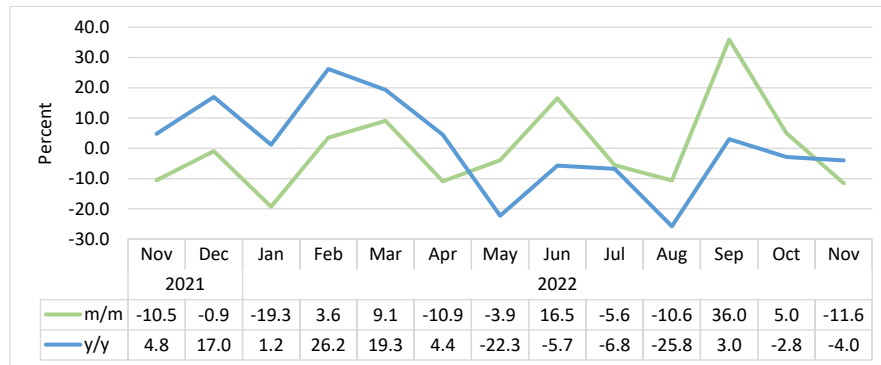

¹ This graph is limited to -40 percent and 40 percent for better readability.

Chart 4: Gold Bullion Production Index, Percentage Change

- The **Gold Bullion Production Index** slowed on monthly basis by recording a marginal increase of 0.9 percent in November 2022, downward from a growth of 11.5 percent posted in October 2022. Conversely, the index declined by 17.5 percent year on year, (Chart 4).
- The increase in gold production on a monthly basis was merely due to high grade ore mined during the period under consideration in November 2022.
- The production of gold bullion stood at 704 kg in November 2022, compared to 698 kg and 854 kg that was recorded in October 2022 and in the corresponding month of 2021, respectively.

Chart 5: 'Zinc concentrate & contained' Production Index, Percentage Change

- The **'Zinc concentrate & contained' Production Index** (Chart 5) declined on monthly basis by 11.6 percent during the period under review, downward from a growth of 5.0 percent posted in October 2022. Additionally, the index declined over the year, recording a reduction of 4.0 percent.
- The monthly decline recorded in the production of 'Zinc concentrate and contained' was mainly derived from the mining of low-grade ore during the review period.
- Namibia produced 7 293 tonnes of Zinc concentrate and contained during the reporting period, compared to the production of 8 248 tonnes and 7 595 tonnes recorded for October 2022 and the corresponding month of 2021, respectively.

Table 1: Mining Composite Index of the Selected Minerals

Year	Month	Diamonds	Uranium	Zinc concentrate & contained	Gold Bullion	Composite Index
2018	Jan	142.5	240.6	104.7	126.3	148.0
	Feb	117.4	141.7	88.2	129.4	120.0
	Mar	113.2	98.8	109.9	83.6	105.5
	Apr	130.6	248.3	87.3	85.9	133.2
	May	117.2	199.4	109.8	81.1	119.1
	Jun	136.1	212.3	110.1	110.5	138.1
	Jul	117.9	211.1	110.0	110.3	126.0
	Aug	103.2	267.3	135.1	85.8	119.7
	Sep	90.5	224.8	105.8	108.7	109.1
	Oct	127.1	158.7	113.1	110.1	126.2
	Nov	119.8	193.7	112.9	99.9	123.6
	Dec	99.0	150.5	107.0	115.7	107.5
2019	Jan	123.4	200.0	116.1	91.2	125.3
	Feb	107.7	163.5	105.4	83.4	109.0
	Mar	96.9	141.4	126.8	79.4	99.7
	Apr	77.2	211.7	111.8	94.6	96.7
	May	68.9	164.7	110.1	92.3	85.4
	Jun	83.1	190.6	101.6	112.4	100.8
	Jul	106.2	202.5	95.4	149.1	123.4

	Nov	149.2	180.1	87.7	136.0	146.4

Definitions

- **Diamond:** Is a very hard mineral that is in the form of bars of carbon and is used, especially in Jewellery.
- **Gold Bullion:** Is a gold or silver in bulk before coining or valued by weight which means gold bullion is gold valued purify and weights.
- **Zinc:** Is a metallic element with a blue-white colour, used as a protective covering for iron and to make metal alloys like nickel silver.
- **Uranium:** Is a Silver-heavy radioactive polyvalent metallic element that is found especially in uraninite and exists naturally as a mixture of mostly no fissionable elements.

Methodology notes and data sources

Data Sources: Data sourced from Bank of Namibia for the period starting from January 2019.

Base year: The Mining sectoral report is harmonised with the quarterly and annual National Accounts base year 2015.

Index calculations: The index of mining production was weighted using the value-added data of 2015. The index is then calculated as a ratio of the volume of a specific component in a specific month to the total volume of that component in 2015.

Conversion: 1 basis point = 0.01 percent
